COURSE DESCRIPTION
The Huda Physics Review is designed for Radiology residents preparing to take the ABR physics examination already familiar with Radiological Physics by reading an appropriate book and/or taking a didactic course. This review will cover image formation of all x-ray modalities (i.e., radiography, fluoroscopy, CT) as well as NM, US and MR. In addition, image quality, radiation dosimetry and radiological safety will be covered. The didactic lectures are supplemented by formal reviews of ABR style questions, as well as informal sessions that will focus on examination recall questions.

Walter Huda, PhD is a Professor of Radiology at the Medical University of South Carolina, and the author of Review of Radiologic Physics.

“Highly Recommended” “Dynamic Instructor” “Clear Explanations” “Succinct and Salient” “Concise…Conveys Concepts Easily”
